

# Sohail khan

## Frontend Developer

**Phone:** +91 9983937070

**Email:** sohaikhana23as23@gmail.com

**Location:** Jaipur, Rajasthan, India

**LinkedIn:** linkedin.com/in/sohaikhana68

**GitHub:** github.com/sohaikhana-68

## Professional Summary

Experienced React.js developer with 7 months of experience in building responsive and user-friendly web applications. Skilled in crafting scalable frontend solutions, collaborating with cross-functional teams, and integrating APIs for seamless functionality. Successfully managed end-to-end frontend projects, delivering scalable and high-quality solutions with a strong emphasis on innovation and user-centric design — resulting in improved user engagement and performance.

## Technical Skills

**Languages:** JavaScript (ES6+), HTML5, CSS3

**Libraries/Frameworks:** React.js, React Native, Tailwind CSS, SCSS, Material UI, Node.js, Bootstrap

**DataBase:** MongoDB

**Tools:** Git, GitHub, Vite, Figma, VS Code Others  
REST API integration, Responsive Design,  
Socket.io (real-time apps)

## Soft Skills

- Team Collaboration
- Effective Communication
- Problem-Solving
- Time Management

## Professional Experience

### Frontend Developer

Orbit Radix Technology, Jaipur, India

June 2024 – September 2024

- Collaborated in a 4-member Agile team to design and develop a responsive web-based dashboard for managing PCB design data and workflow tracking.
- Created 10+ reusable and modular React components to visualize circuit layouts, track production stages, and manage dynamic BOM (Bill of Materials) updates.
- Emphasized clean, accessible UI/UX using Bootstrap CSS, resulting in a 30% reduction in user onboarding time for engineering and QA teams.
- Conducted unit testing and UI validation, reducing post-deployment UI bugs by ~25%.

## Frontend Intern

Groot Solution, Jaipur, India

Jan 2025 – Apr 2025

- Developed a responsive MLM dashboard using React.js for managing users' commissions and referral tracking.
- Integrated Firebase-based real-time data handling and authentication systems, achieving 99.9% uptime and secure, seamless user interactions.
- Designed intuitive UI components using Material UI (MUI) to enhance user experience and navigation flow.
- Enabled multi-tier referral structures and visualized user hierarchies to support efficient admin management.

## Projects

### Learning Management System (LMS)

- Implemented user authentication, course management, and progress tracking using JWT, MongoDB, and Express APIs.
- Designed and developed responsive UI components with React and MUI, improving page load speed by 30% and reducing bounce rate by 20%.
- Optimized backend performance with efficient MongoDB queries and RESTful API architecture.

### Chatgram (Real-Time Chat App)

- Designed and launched a feature-rich chat application using React.js and Socket.io, enabling real-time text messaging with instant delivery confirmation.
- Leveraged WebSocket connections to establish persistent, low-latency communication between users.
- Built secure login and session management features using token-based authentication.

### Salah App (Prayer Time App)

- Engineered a responsive mobile app using the MERN stack (MongoDB, Express.js, React Native, Node.js) to deliver accurate, location-based Islamic prayer timings.
- Integrated Islamic APIs and mapping to locate nearby mosques.
- Incorporated dynamic GPS-based tracking to personalize results and optimize accuracy of timing data.

## Education

### Bachelor of Science (B.Sc)

MDS University, Ajmer, India

2021 – 2023

Gained foundational knowledge in scientific subjects while independently building strong skills in frontend development through self-study and personal projects

## Languages

**Hindi:** Native

**English:** Professional Proficiency
